 Triman Kaur

 trimankaur1905@gmail.com

 Triman1905

Technical Skills

Languages & Programming: Python, SQL

Data Science & AI: Data Analysis, Machine Learning, Deep Learning using Pandas, NumPy, Scikit-Learn, TensorFlow, PyTorch

BI & Databases: Power BI, Tableau; MySQL, MongoDB

APIs & Backend: RESTful APIs with FastAPI and Pydantic

Agentic AI & Automation: n8n, Make.com (workflow orchestration and autonomous pipelines)

Cloud & DevOps: Google Cloud, Docker

Data Engineering & Tools: Apache Airflow, Git, GitHub, Visual Studio Code

Core Strengths: Data-driven decision-making, analytics, automation, and problem-solving

Work Experience

Data Science Intern – TBO TECH LIMITED

June 2025-Aug 2025

Built interactive dashboards to visualize key business metrics and support strategic decision-making.

Used AWS Athena to write complex SQL queries, retrieve data, and establish connections across multiple tables. Built an email classifier using a self-made model with an accuracy of 96%.

AI Solutions Intern – EY (Ernst & Young)

June 2026-Sept 2026

Selected for EY's AI Solutions Internship Program to contribute to enterprise AI initiatives and digital transformation projects.

Will collaborate with industry professionals to develop data-driven solutions, explore Generative AI applications, and support innovation through advanced analytics and emerging AI technologies.

Publications

Book Chapter: Prompt Engineering and Optimization for Large Language Models, Bentham Science — submitted to Scopus-indexed publication.

Research Paper: Value-Latency in AI-Driven Organizations: The Hidden Delay Between Algorithmic Decisions and Human Well-Being – A Human Sustainability Perspective.

Projects

Dr. Krishi - KrishiAI

An AI-powered agricultural advisory platform enabling farmers to detect crop diseases, predict risks, and receive expert treatment through image, text, or voice inputs. Combines computer vision, CNN + XGBoost, GPT-4o Vision, RAG pipelines, and conversational AI for real-time diagnosis, forecasting, multilingual advisory, and automated agronomist escalation, built on scalable cloud-native infrastructure with FastAPI, Docker, and Kubernetes.

Autonomous-Agentic-AI-Framework

A production-grade multi-agent AI research assistant that automates planning, source retrieval, validation, evidence extraction, and report synthesis to generate structured, citation-backed research reports. Built with CrewAI, Python, OpenAI, Exa, Tavily, and modular agent pipelines for reliable, iterative deep research.

Investrix

Investrix is a decentralized investment platform leveraging Plotch.ai for AI-driven recommendations and Aptos blockchain for secure bidding and fraud-proof transactions. It connects investors with SMEs through a competitive bidding system while prioritizing sustainable and Make in India initiatives. Built with React.js, Firebase, TensorFlow, and Aptos Smart Contracts for scalability and trust.

Education

Vivekananda Institute of Professional Studies - Technical Campus

2023-2027

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Brain International School, Vikaspuri

New Delhi, Pure Science with Computer Science, Aggregate – 94%, PCM

2023

Achievements

Won 3rd position in ENGAGE 4.0 hackathon organized at North cap University.

Won 2nd position in Hackathon organized by TechShiva institute.

Won 3rd position in Code Genesis Hackathon organized by Microsoft India.

Won 3rd position in HACK'25 organized at IIIT Delhi.

Secured 1st position in a hackathon at IIIT Delhi's E-Summit 2025.
